

EGOR VERKHOZIN

contact@verkh.tech • verkh.tech • [LinkedIn](#) • [GitHub](#)

Founding Engineer • Zero-to-One Prototyper • AI-Native • Remote

SKILLS

Languages	Swift, Rust, TypeScript, Python.
Mobile / Desktop	SwiftUI, native macOS/iOS APIs, Tauri (Rust).
Web / Full-stack	React, Tailwind, Node.js, FastAPI.
AI	LLM providers, MCP, RAG, agents.
Infra	Linux, Docker, PostgreSQL, CI/CD.

SELECTED PROJECTS

- **Airwind Email** - email client with custom-domain sending, HTML design, multi-account inbox. Tauri, Rust. *Solo, open source.*
- **CLiOS** - iOS companion app for the OpenClaw AI agent. Swift, SwiftUI. *Solo build; shipping to TestFlight beta.*
- **Ohm Audio** - desktop audiophile music player. Tauri, Rust. *Solo build, shipped in 1 week.*

EXPERIENCE

Founder & Engineer 2024 - Present
Verkh.tech - product studio for early-stage startups

- Founded the studio; engagements span pre-seed/seed/Series A startups - YC applications, fundraising sites, MVPs, brand systems (NDA).
- Own each engagement end-to-end (discovery, architecture, code); scale teams solo to 4-10 contractors per project.

Founding Engineer Jul 2024 - Apr 2026
Skygen.ai - AI computer-use agent (\$7M raised, 100k+ users)

- First engineering hire; owned the client stack (macOS, web, marketing) as team grew 1 to 20+.
- Built the macOS app (Tauri/Rust + React) and OS-control MCP server (Accessibility, ScreenCaptureKit, input automation, screen recording) - gave the agent full OS control.
- Owned product, design, and brand from day one; shipped 50+ end-to-end features; architecture and standards still in production.

Product Engineer Feb 2024 - Jul 2024
OrbosAI - Telegram-native AI media generation

- Spotted L1 triage as the 3-engineer team's bottleneck; shipped GPT-powered bot that autonomously closed roughly 40% of routine tickets (data validation, formatting fixes).
- Designed and shipped the first-ever in-Telegram video editor - native video creation without leaving the app.
- Scoped and shipped 20+ AI media generation integrations across text, image, video, and voice - the multi-provider stack at the core of the product.

Full-Stack Developer Jul 2023 - Dec 2023
Hunt.ME

- Built AI text+voice conversation bot for outbound lead gen - per-rep throughput grew from 7 to 30 leads/day; total client volume +20%.
- Built cross-posting tool with video uniqueization (filter tweaks, dynamic logo, animation) - 40+ social accounts without duplicate-content flags.
- Automated HR workflows (+30% placement speed); rebuilt CRM into team's daily driver.

Full-Stack Developer 2020 - 2023
Contractor / Freelance

- Shipped 30+ web and mobile projects for international clients via Fiverr and Upwork.
